Installation guide

home energy monitor Starter Pack

Sitecom and NET2GRID

Many energy suppliers offer a way to gain insights into your energy use. We believe that you don't have to be tied to a supplier to gain insights into your energy use.

NET2GRID provides an easy solution to measure and monitor your home's energy consumption. That's why we have partnered up with them.

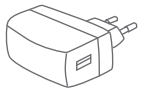
Package content

2x SmartPlugs

1x Micro USB cable

1x SmartBridge

1x Network cable

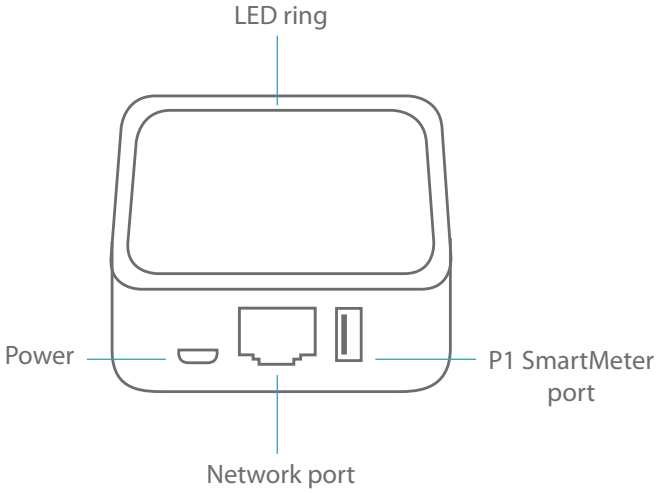


1x Power adapter

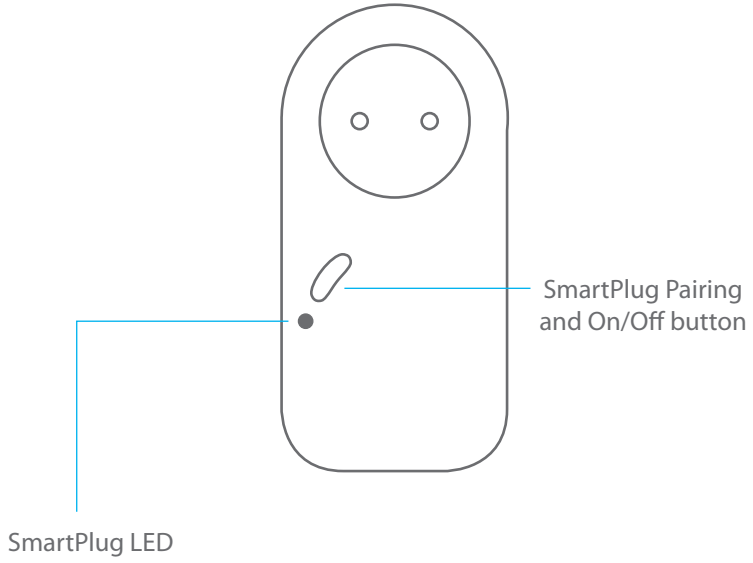
EN

EN

SmartBridge



SmartPlug



- Pairing mode: LED blinking red/green, ready to connect to smartbridge.
- Smartplug ON: LED is solid green / Smartplug OFF: LED is off.

EN

Before you start

Write down the SmartBridge ID

SmartBridge

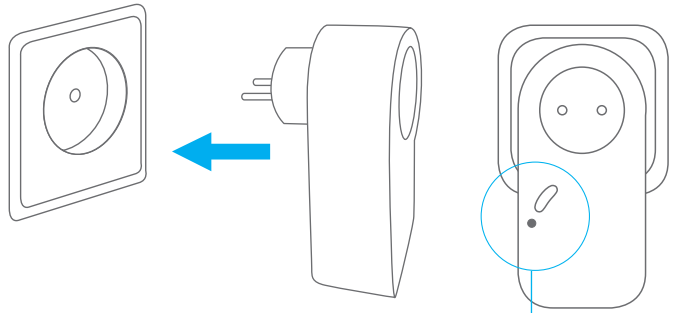
1

Install the SmartBridge & SmartPlugs

EN

1 Plug the SmartPlugs into a power socket.

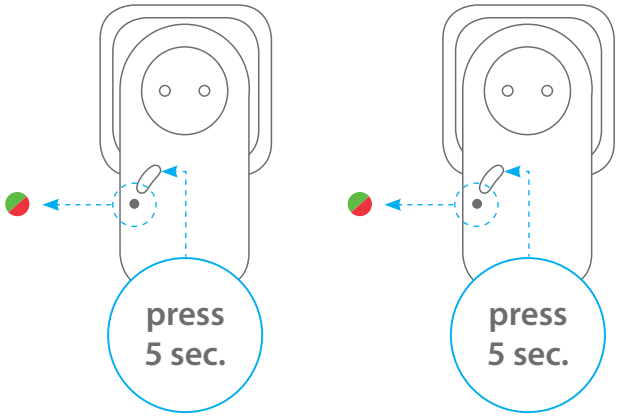


Check if the SmartPlug LEDs are green.
If not press the button to turn on the SmartPlug.

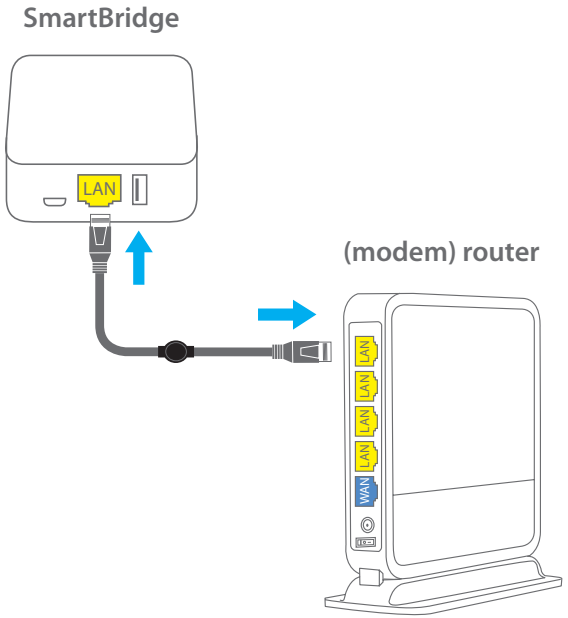
- Make sure to use power sockets close to the (modem) router for installation.
- After successful installation you can move the SmartPlugs anywhere in your house.

EN

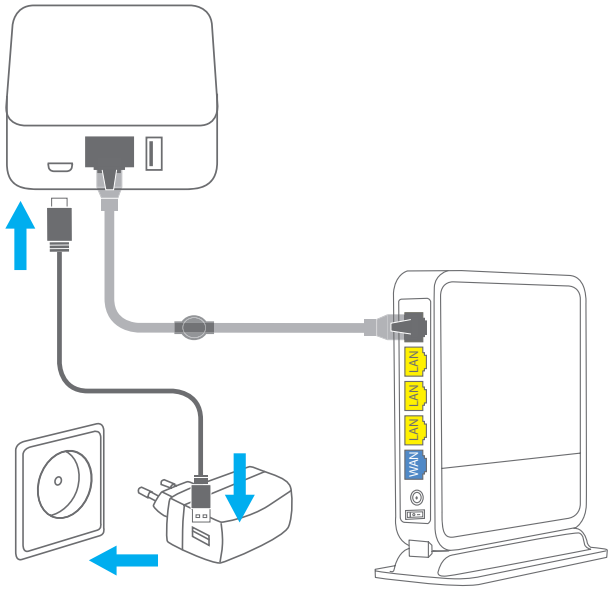
2 Push the button on each of the two SmartPlugs for 5 seconds until the LED starts to blink green and red.



3 Connect the SmartBridge to your (modem) router with the supplied network cable.



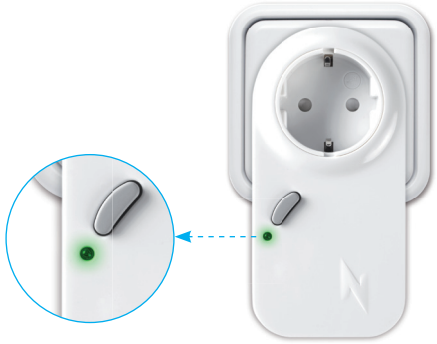
4 Connect the micro USB cable to the SmartBridge and to the USB power adapter and plug the power adapter into a wall socket.



5 When the LED's turn solid blue your SmartBridge has been installed.

EN

6 Check that the LEDs of the SmartPlugs have turned solid green.



- Now you can move the SmartPlugs and plug in the devices you would like to measure.
- The button can now be used to turn the plugs on and off.

Sitecom und NET2GRID

Viele Energieversorger bieten ihren Kunden eine Möglichkeit, einen Einblick in ihren Energieverbrauch zu erhalten. Wir sind jedoch der Ansicht, dass Sie sich für diese Informationen nicht an einen Energieanbieter binden müssen.

Mit NET2GRID können Sie Ihren Stromverbrauch zu Hause ganz einfach selbst messen und überwachen. Aus diesem Grund haben wir uns für eine Partnerschaft mit Net2Grid entschieden.

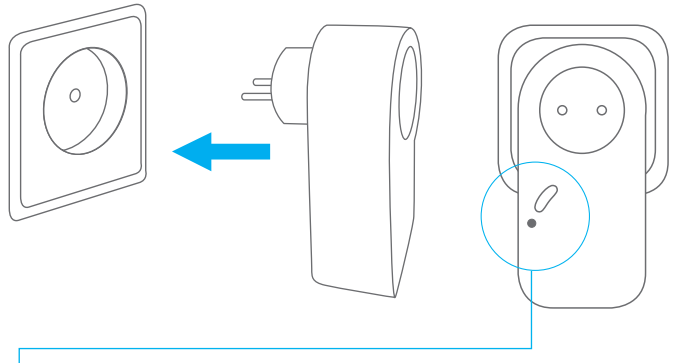
SmartBridge und SmartPlugs installieren

DE

1 Schließen Sie die SmartPlugs an eine Steckdose an.

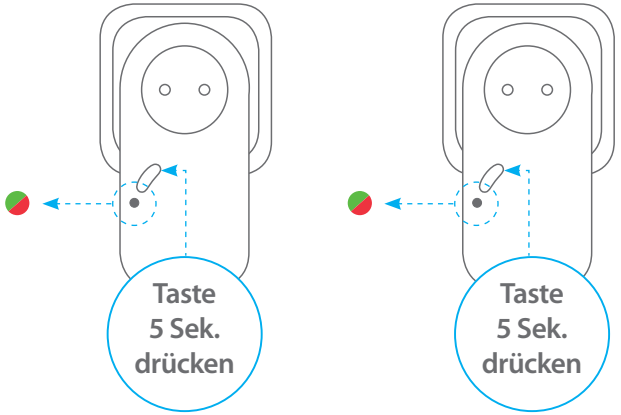


Kontrollieren Sie, ob die SmartPlug LEDS grün leuchten.
Falls nicht, drücken Sie die Taste um den SmartPlug anzuschalten.

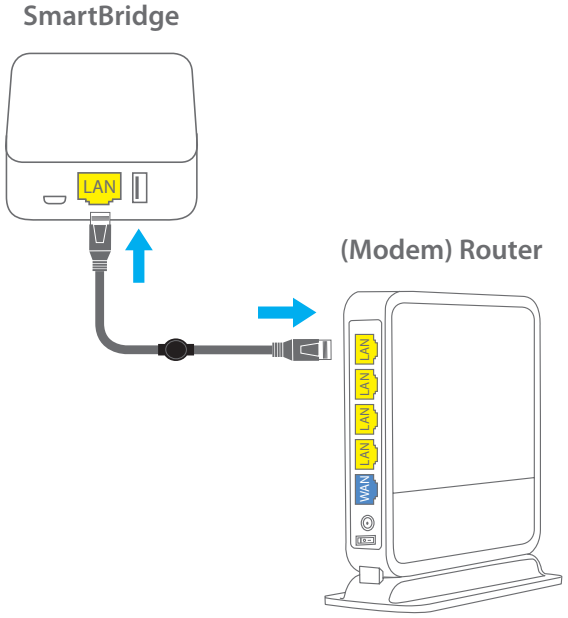
- Die Steckdosen sollten sich in der Nähe des (Modem) Routers befinden.
- Nach Abschluss der Installation können Sie die SmartPlugs frei im Haus bewegen.

DE

2 Halten Sie die Tasten an den beiden SmartPlugs 5 Sekunden lang gedrückt, bis die LEDs grün und rot blinken.

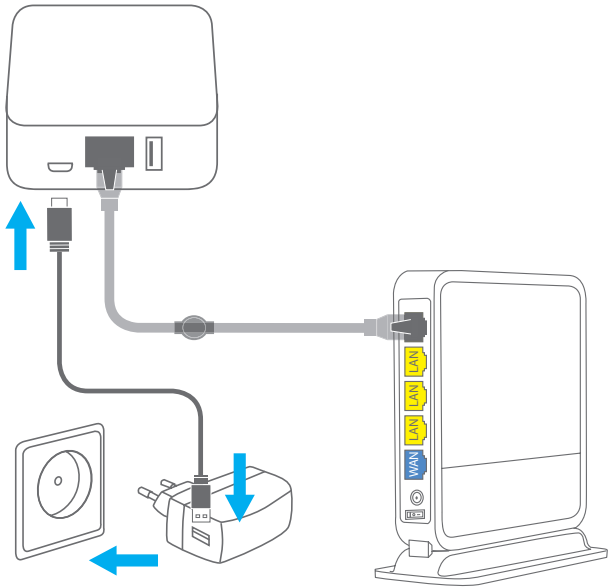


3 Schließen Sie die SmartBridge über das im Lieferumfang enthaltene Netzwerkkabel an Ihren (Modem-) Router an.



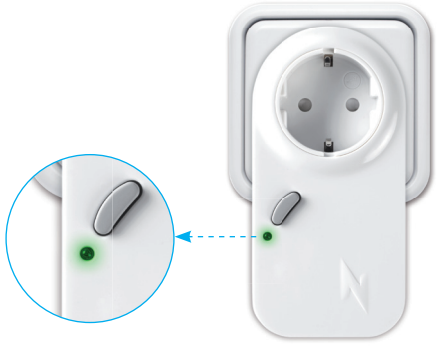
DE

4 Schließen Sie das Micro-USB-Kabel an die SmartBridge und an das USB-Netzteil an, und stecken Sie das Netzteil in eine Steckdose.



5 Wenn die LEDs blau leuchten, wurde die SmartBridge ordnungsgemäß installiert.

6 Vergewissern Sie sich, dass die LEDs der SmartPlugs grün leuchten.



- Nun können Sie Geräte an die SmartPlugs anschließen, deren Energieverbrauch Sie messen möchten.
- Die Taste kann nun genutzt werden um die SmartPlugs an und aus zu schalten.

home energy monitor Starter Pack

Sitecom e NET2GRID

Molti fornitori energetici offrono un modo per capire quanta energia si sta consumando. Ma secondo noi, per capire quanta energia stai consumando non hai bisogno di essere legato a un fornitore.

NET2GRID offre una soluzione semplice per misurare e monitorare i consumi energetici di casa. È per questo che abbiamo scelto loro come partner.

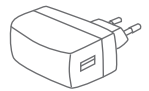
Contenuto

2x SmartPlugs

1x Cavo Micro USB

1x SmartBridge

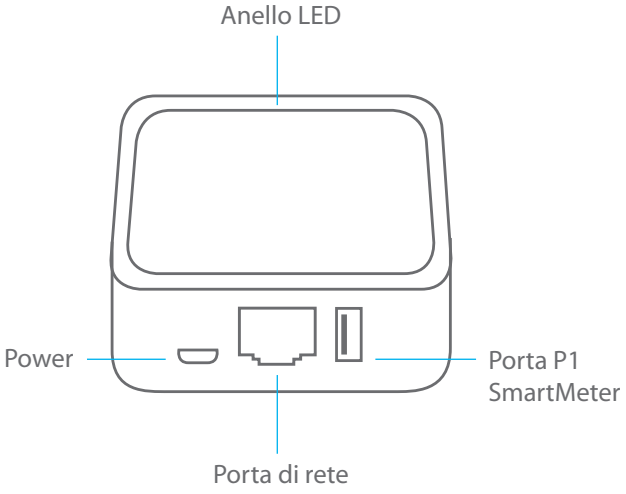
1x Cavo di rete



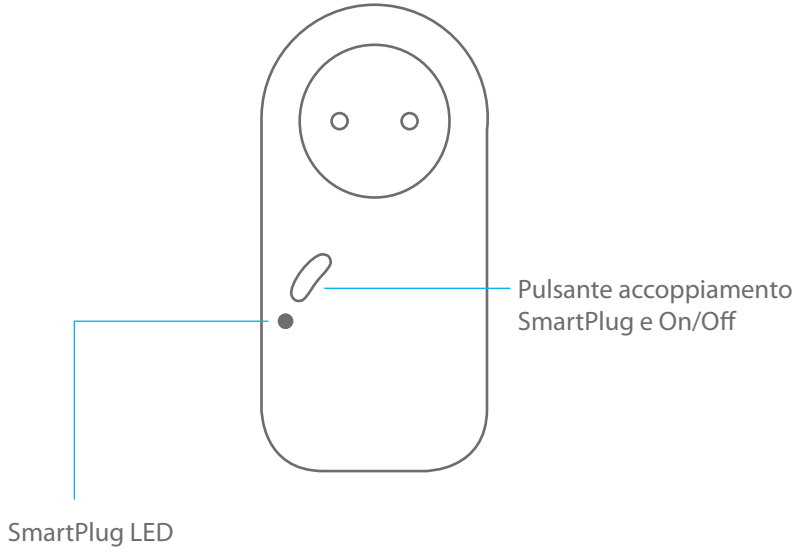
1x Adattatore di potere

IT

SmartBridge



SmartPlug

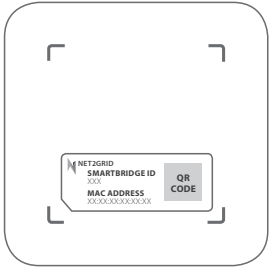


- Modalità accoppiamento: LED lampeggiante rosso/verde, pronto alla connessione con lo SmartBridge.
- SmartPlug ON: LED verde fisso / SmartPlug OFF: LED spento.

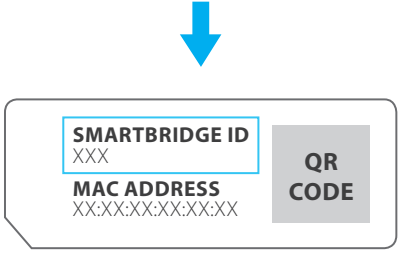
Prima di iniziare

Prendi nota dell'ID di SmartBridge

SmartBridge
Lato superiore



SmartBridge
Lato inferiore

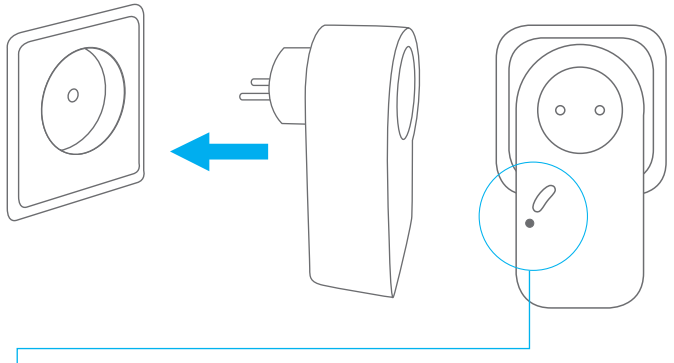


1

Installazione di SmartBridge e degli SmartPlug

IT

1 Collega gli SmartPlug a una presa di corrente.

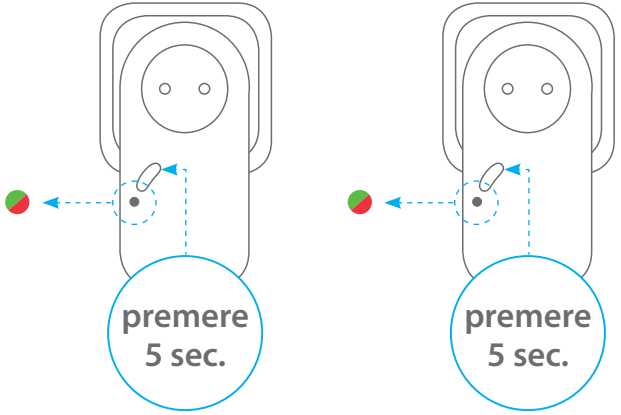


Controlli se i LED dello SmartPlug sono verdi.
Se non lo sono, prema il pulsante per accendere gli SmartPlug.

- Ricordati di usare due prese di corrente vicine allo (modem) router per l'installazione.
- Al termine dell'installazione, potrai spostare gli SmartPlug in qualsiasi punto della casa.

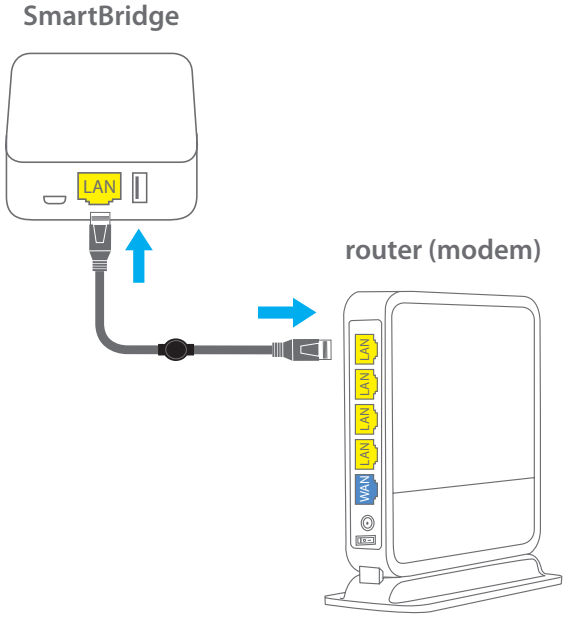
2

Tieni premuto per 5 secondi il tasto di ciascuno dei due SmartPlug finché non lampeggiano prima la luce verde e poi quella rossa.



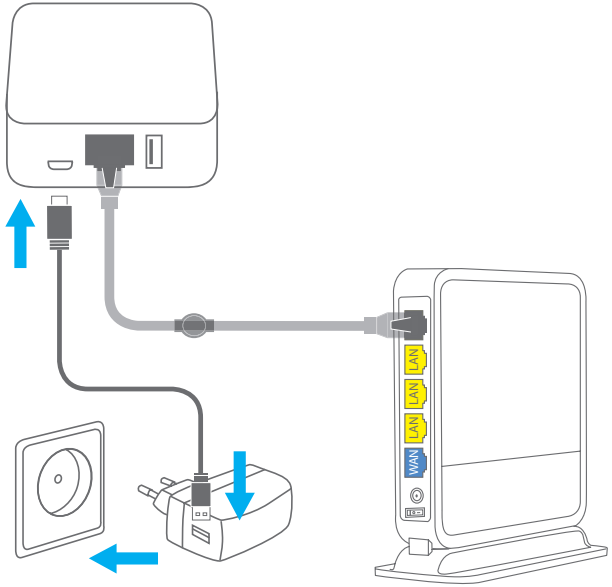
3

Collega SmartBridge al router (modem) mediante il cavo di rete fornito in dotazione.



4

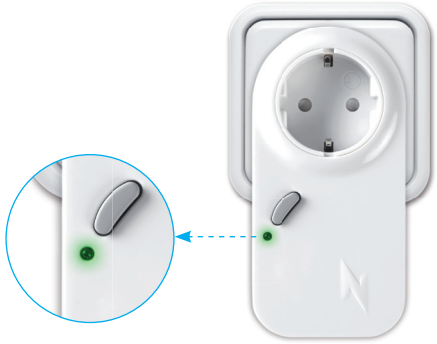
Collega il cavo micro USB allo SmartBridge e all'alimentatore USB, quindi collega l'alimentatore a una presa di corrente.



5

Quando il LED diventa blu fisso, significa che lo SmartBridge è stato installato correttamente.

6 Verifica che il LED degli SmartPlug sia verde fisso.



- Ora puoi spostare gli SmartPlug e collegare i dispositivi da misurare.
- Il pulsante può ora essere usato per accendere o spegnere le spine.

2

Registrazione di NET2GRID

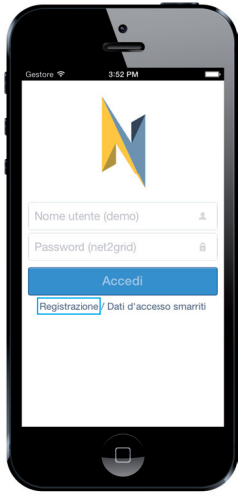
1 Scarica l'app gratuita NET2GRID Energy Insight dall'App Store o da Google Play.

Available on the App Store

ANDROID APP ON Google play

2 Apri l'app e fai clic su "registrazione" nella pagina iniziale.

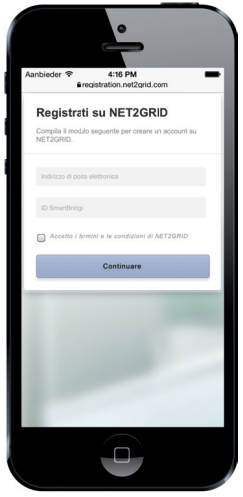
iOS



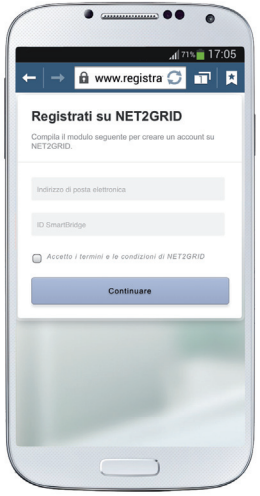
Android

3 Compila il modulo di registrazione, indicando anche l'ID di SmartBridge annotato in precedenza.

iOS



Android



4 Controlla l'account di posta elettronica e segnati il nome utente e la password forniti.

Sitecom y NET2GRID

Muchos proveedores de energía ofrecen un modo de llevar el control de su gasto energético. Creemos que no debe estar atado a un proveedor para llevar el control de su gasto energético.

NET2GRID ofrece una solución sencilla para medir y controlar el consumo energético de su hogar. Por ello, nos hemos asociado con ellos.

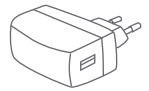
2x SmartPlugs

1x Micro cable USB

1x SmartBridge

1x Cable de red

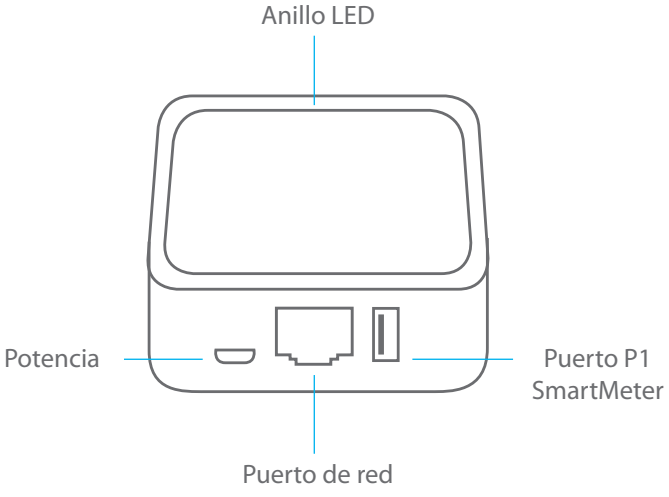


1x Adaptador de corriente

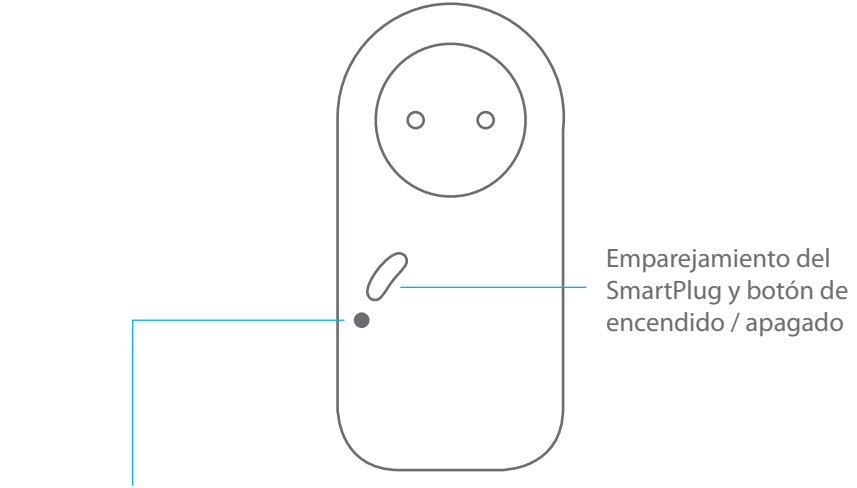
ES

ES

SmartBridge



SmartPlug



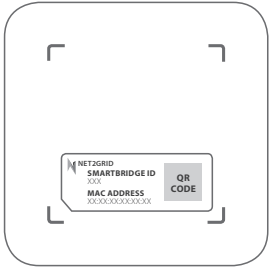
- Modo de emparejamiento: LED destella en rojo/verde, está listo para conectarse al SmartBridge.
- SmartPlug encendido: El LED es verde constante / SmartPlug apagado: El LED está apagado.

ES

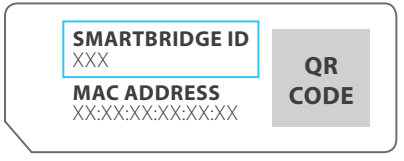
Antes de comenzar

Anote el ID de SmartBridge

SmartBridge
Parte superior



SmartBridge
Parte inferior

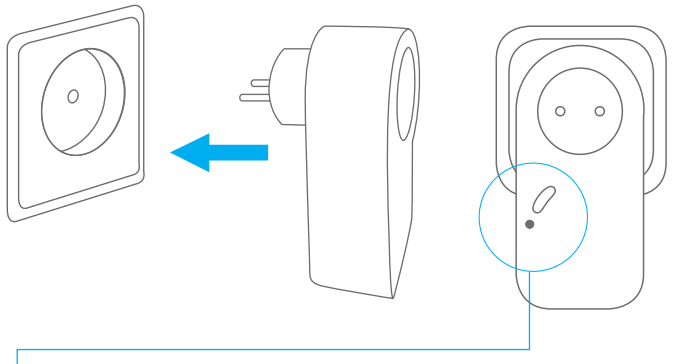


1

Instalación del SmartBridge y de los SmartPlugs

ES

1 Enchufe los SmartPlugs en una toma de corriente.

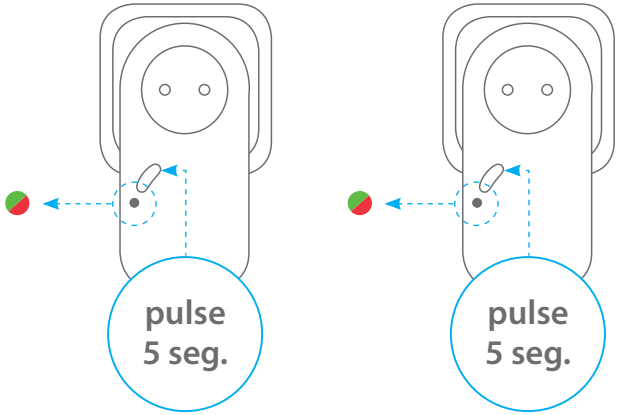


Compruebe si el LED de los SmartPlugs es de color verde.
Si no es así, pulse el botón para encender el SmartPlug.

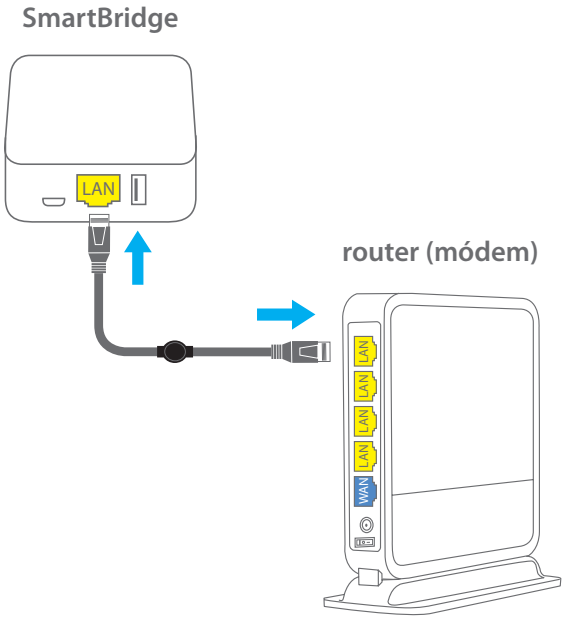
- Asegúrese de utilizar dos tomas de corriente cercanas al router (módem) para la instalación.
- Después de realizar la instalación correctamente, puede mover los SmartPlugs a cualquier lugar del hogar.

ES

2 Pulse el botón en cada uno de los dos SmartPlugs durante 5 segundos hasta que comience a parpadear en verde y rojo.

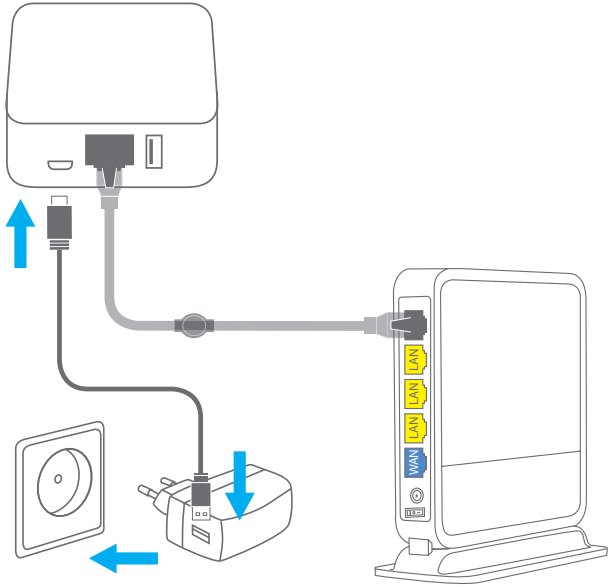


3 Conecte el SmartBridge a su router (módem) con el cable de red suministrado.



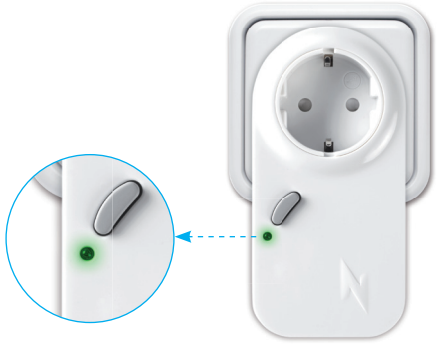
ES

4 Conecte el cable micro USB al SmartBridge y al adaptador de potencia USB y enchufe el adaptador de potencia en la toma de corriente.



5 Cuando el LED sea de color azul fijo, su SmartBridge estará instalado correctamente.

6 Compruebe que el LED de los SmartPlugs sea de color verde fijo.



- Ahora puede mover los SmartPlugs y enchufarlos a los dispositivos que desee medir.
- El botón se puede utilizar ahora para encender y apagar los SmartPlugs.
